

Product Brochure Skidata

Our mission

We deliver high-quality, custom 3D-printed components that protect, support, and extend the lifespan of Skidata's access and parking systems. Backed by engineering expertise, our solutions are built for functional design, durability, and reliability — performing in the demanding environments where Skidata systems operate, such as public spaces and outdoor installations.

How we work

1. Pick & Print

Choose from the products on the following pages: a selection of the most ordered solutions by *Skidata Belgium* and *the Netherlands*, already developed and ready to order. These solutions protect, support, and extend the lifespan of critical access and parking systems, and have proven their value in real-world applications throughout Belgium and the Netherlands.

2. Let's develop together.

Have an idea that doesn't exist yet? Our managing director, Pascal Cannoodt, previously worked at Skidata, where he developed practical solutions for specific needs not yet covered within the standard product range. This experience allows us to understand system requirements from the inside — and to translate them into new, tailor-made components.

Need something additional or custom? **Get in touch:** we'd be happy to explore the possibilities together.

*All prices are indicative.

As standard, the product is supplied in black ABS. Colours and text can be customized to meet customer requirements.

*All products can be shipped upon request. To place an order, please contact us by email.

Pick & Print

1. *Protection for Door.Gate*

Excl. base plate: € 173,-

Incl. base plate: € 259,-

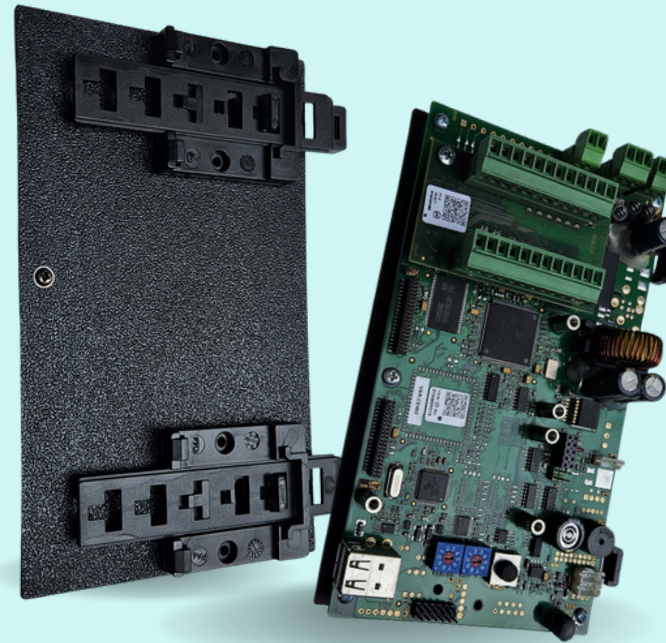

This protective cover is designed to safeguard the Door.Gate unit against vandalism in public and high-traffic environments:

- Available with or without a metal base plate, allowing for flexible installation
- The base plate facilitates secure and straightforward wall mounting.
- The protection is available in both high and low versions, depending on whether an intercom is installed.
- Manufactured from durable, water-resistant materials, the cover is suitable for outdoor use.
- It is widely deployed and approved at train stations across Belgium.

2. Protection for TO-US

€ 57,-

This protective cover safeguards the keyboard against vandalism. Mounted over the keyboard, it restricts access to badge-only use. Optional customization, including logos or text, is available.

4. Box for built-in board TO-US

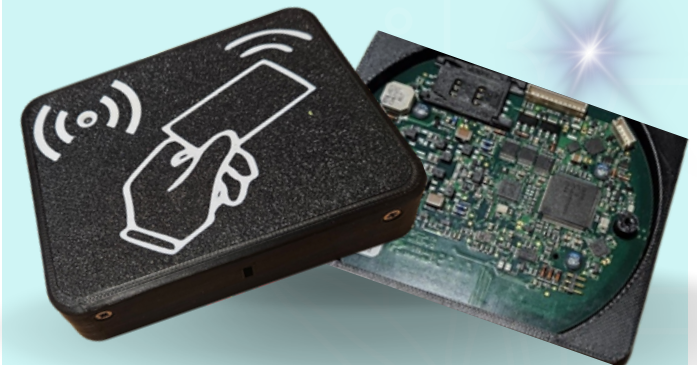

€ 68,-

This compact enclosure houses the TO-US keyboard circuit board only, offering a slim and elegant design. The water-resistant construction makes it suitable for outdoor use. Custom logos or markings are available on request.

3. SD582 mounting plate

€ ..., -

Allows the SD582 to be mounted securely and neatly on your kiosk or housing

5. Ticket Guide

€ 38,-

Mounted directly in the power.gate, just above the ticket boxes, the ticket guide keeps every ticket running smoothly along its own path. It prevents tangling and ensures a clean, reliable feed every time.

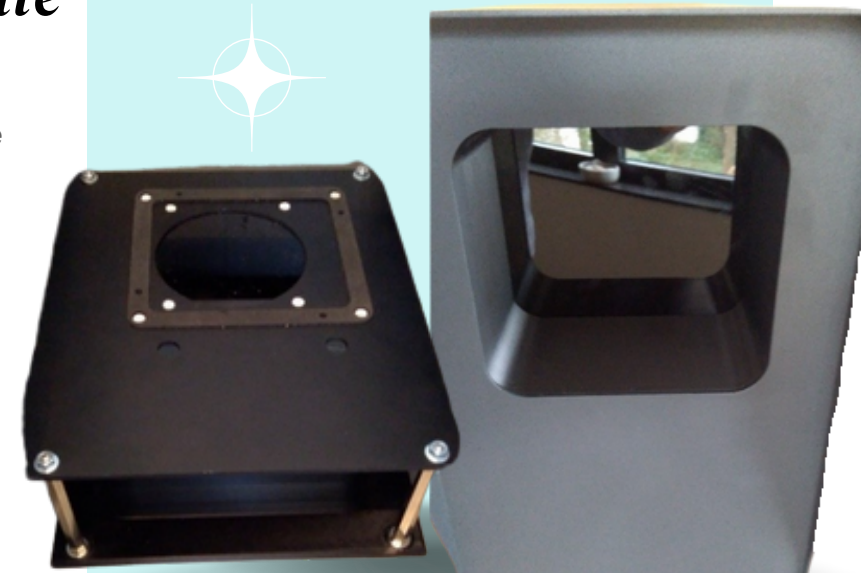

6. UPS for Barrier.Gate

€ 370,-

This UPS ensures the barrier can be safely opened in the event of a power failure.

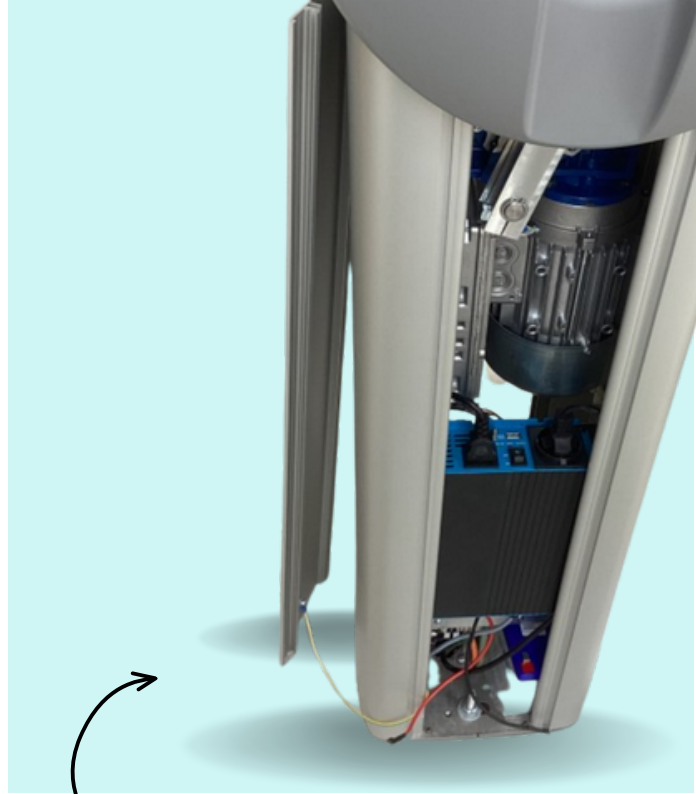

It is installed at the rear of the barrier, with the battery positioned at the bottom for easy access and maintenance.

7. Bollard LPR camera protection against low sun

€ 167,-

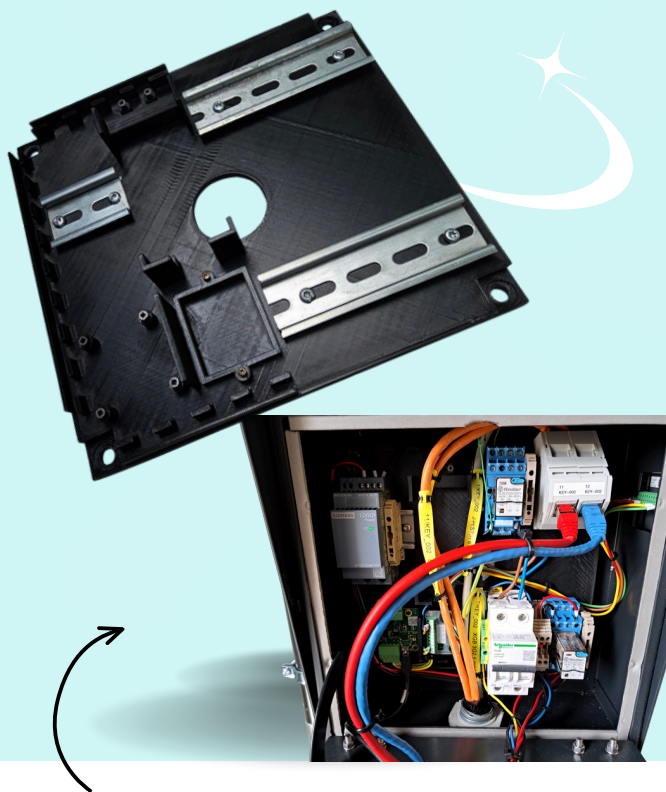

This adapter positions the Arvoo bollard camera further back, improving protection against low-angle sunlight and rainfall.

8. Metal plate *power.gate*

€ 60,-

A metal plate, standard to the power.gate, custom-adapted for mounting the components required for this installation.

9. Customisable *mounting plate*

€ 63,-

This plate is used for mounting components. In the attached example, it has been designed to hold the components required for powering and controlling a door.gate. The plate can be customized to suit the specific situation and needs of the installation.

10. Metal plate *skiosk.smart*

€ 145,-

A metal plate, standard to the Skiosk.smart, custom-adapted for mounting the components required for this installation.

11. *Mounting plate for Adyen terminal and Print@Home unit*

€ 60,-

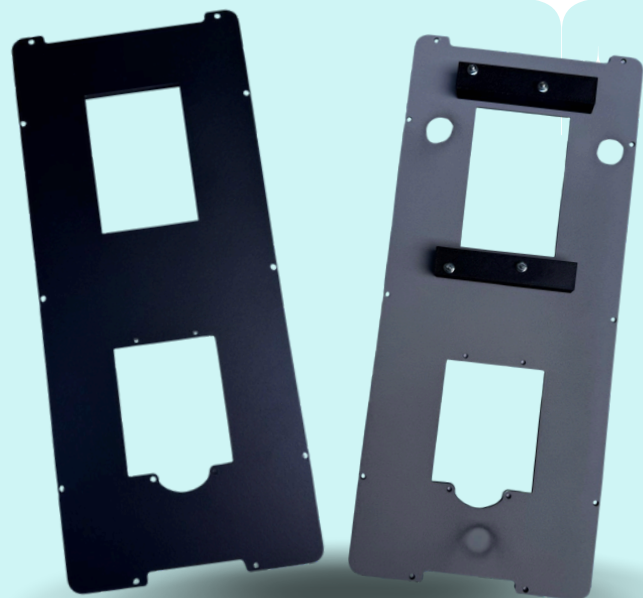

One plate to mount both the Adyen terminal and the Print@Home, keeping the installation compact and stable.

13. *Mounting plate for Skiosk.Lite with Adyen terminal and cut-outs for RFID reader and Print@Home unit*

€ 215,-

Mounting plate for the Skiosk.Lite, holding an Adyen terminal and prepared with cut-outs for an RFID reader and a Print@Home.

12. *Mounting plate for CCV IM30 and Print@Home unit*

€ 60,-

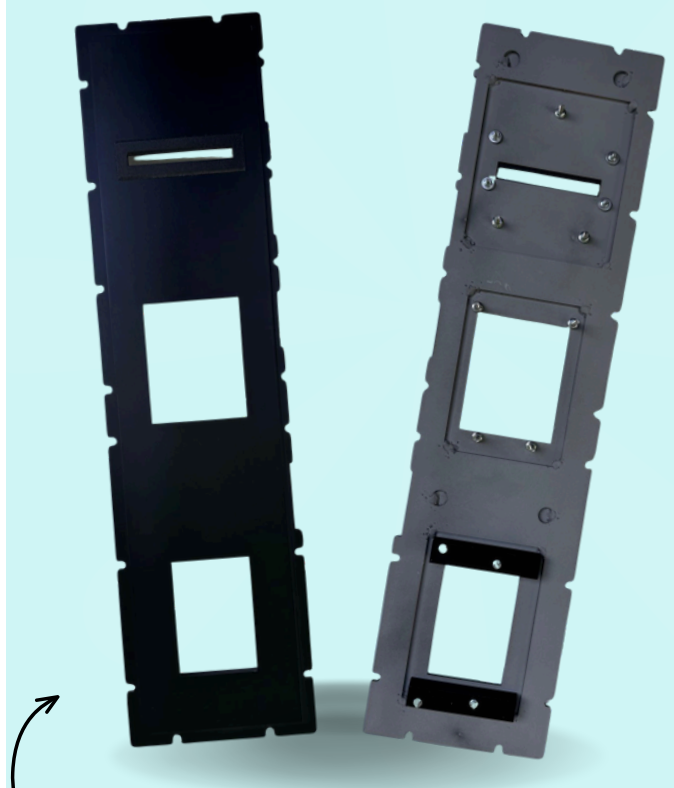

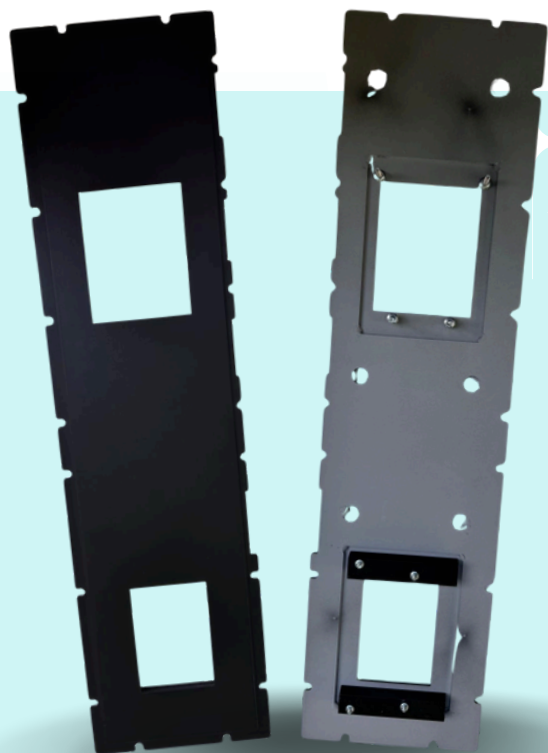

One plate to mount both the CCV IM30 and the Print@Home, keeping the installation compact and stable.

14. *Mounting plate for Skiosk.Smart with CCV IM30 and Print@Home unit*

€ 145,-

Mounting plate for the Skiosk.Smart, designed to hold both a CCV IM30 and a Print@Home

15. *Mounting plate for Skiosk.Smart with Skidata printer, CCV IM30 and Print@Home unit*

€ 165,-

Mounting plate for the Skiosk.Smart, designed to hold a Skidata printer, a CCV IM30 and a Print@Home

16. *Your product?*

Let's develop together!

Do you have a product in mind, or a specific need? Let's design it together: a custom solution that fits your requirements perfectly.
